About us

LOGITRANS traces its roots in the logistics sector back to the 1990s. The company's current management structure and the official launch of its operations under the registered LOGITRANS brand date back to 2006.

Since its foundation, LOGITRANS has pursued the mission of providing international companies with transparent, innovative and one-stop logistics solutions. The company's vision is to be a Turkish logistics company operating on the global market, continuing to deliver fully integrated end-to-end logistics services, being environmentally responsible and having completed its branding journey.

Operating across a wide geography covering Asia and Europe, LOGITRANS, with its strong fleet, professional team and international experience, offers road, rail, sea and air transportation services, as well as tailor-made multimodal and intermodal solutions, complemented by warehousing and customs services.

Our Mission & Vision

MISSION

We provide international companies with transparent, innovative and one-stop logistics solutions.

VISION

To become a Turkish logistics company operating sustainably on the global market, delivering integrated end-to-end logistics services, being environmentally responsible and having completed its branding journey.

Logistics and Beyond

LOGITRANS MILESTONES 2006-2011

2006

The “Logitrans” brand was officially registered, and transportation operations to Kazakhstan, Russia and the CIS countries were officially launched.

2007

The Russia office was opened and a 1,000 sqm bonded warehouse was put into operation.

2008

A 17,000 sqm custom-free warehouse area was established.

2009

The Bulgaria office was opened.

2010

The Kazakhstan and Bursa offices were opened, and the owned fleet reached 100 vehicles.

2011

The Ankara office was established.

LOGITRANS MILESTONES 2014-2019

2014

ISO 9001 Quality Management System and OHSAS 18001 certificates were obtained.

2015

Agency agreements in Iran were completed, and railway agency rights were obtained in Kazakhstan.

2016

The owned fleet reached 170 vehicles, and ISO 14001, ISO 27001, ISO 28001 and ISO 10002 certificates were obtained.

2017

Logitrans became one of the first three logistics companies included in the TURQUALITY program, and the Poland office was opened.

2018

Offices were opened in China, Iran, Uzbekistan and Azerbaijan; railway agency rights in Russia were obtained; warehouses were opened in Russia, Kazakhstan and Georgia; customs clearance services were launched; partnerships were established with CDEK and ADP; and Logitrans became a member of IATA.

2019

The intermodal service was launched, the owned fleet reached 215 vehicles, the Tekirdağ office was opened, European LTL and FTL services were initiated, and the Authorized Economic Operator (AEO / YYS) certificate was obtained.

LOGITRANS MILESTONES 2020-2025

2020

E-commerce and e-export services were launched, with agreements signed with the largest marketplaces in Turkey, Russia and Poland.

2021

The Morocco line was opened, e-commerce integration services were expanded to the Turkic Republics, a warehouse in Tuzla was opened, the LogiTrain Poland–Turkey Direct Block Train line was launched, and the owned fleet reached 480 vehicles.

2022

The Tuzla warehouse started operations with a total area of 10,000 sqm, and the Kazakhstan warehouse began service at its new location with an area of 10,700 sqm.

2023

Logitrans participated in trade fairs in six different countries, while investments were made in new transport equipment and the fleet was upgraded.

2024

Investments were made in 50 new vehicles, the IATA Certificate was obtained, and electric vehicles were added to the passenger car fleet.

2025

30% of the passenger car fleet was converted to electric vehicles, the Green Logistics Certificate was obtained, and the owned fleet reached 600 vehicles.

Logitrans Worldwide

Today, Logitrans operates worldwide across a wide spectrum of logistics solutions tailored to the needs of its customers.

With 15 offices in 8 countries and a network of 55 agencies, Logitrans continues to expand its investments and service network.

What is the 360° Service?

At **Logitrans**, we fully understand our customers' logistics needs and strive to deliver the most effective solutions. In order to eliminate supply chain management through fragmented channels and to give back the time our customers lose in coordinating processes, we have developed the Logitrans 360° Solution Concept.

Within this service, in addition to our international transportation solutions, we also provide warehousing, customs clearance and insurance services.

With our 360° Service, designed to ensure cost efficiency and prevent time losses, we offer our customers the convenience of managing the entire supply chain from a single center.

Road transportation

With its modern and young fleet, LOGITRANS provides Less Than Truckload (LTL) and Full Truckload (FTL) road transportation services worldwide. Through our extensive service network and strong agency structure, we combine our expertise in road operations with a customer- and solution-oriented approach, delivering fast, high-quality and reliable logistics solutions.

Serving a wide range of industries from textiles and automotive to construction and retail, we offer flexible, tailor-made road transportation solutions, planning each shipment according to its operational dynamics. With customs clearance and insurance services, cross-docking solutions, third-country road transport and domestic distribution services, we manage your logistics processes from A to Z with LOGITRANS road transportation expertise.

SOME OF OUR SERVICES

- ▶ FTL and LTL road transportation worldwide, primarily to the CIS and Europe, including customs clearance
- ▶ Oversized and out-of-gauge cargo transportation on a global and local scale
- ▶ Cross-trade transportation models to all countries
- ▶ Warehousing services at our YYS (AEO) certified warehouse in Turkey
- ▶ Domestic transportation services

Air Freight

Logitrans Logistics, holding an IATA certification, carries out air cargo transportation operations worldwide. Thanks to our many years of experience and agreements with leading airlines, we offer competitive and cost-effective solutions.

We collect shipments directly from your address and organize air transportation with delivery to the destination you require, providing a full door-to-door service.

For urgent shipments, high-value cargo and sample products, we continue to connect our customers with the most reliable and efficient solutions.

SOME OF OUR SERVICES

- ▶ Airport-to-airport transportation
- ▶ Cross-trade transportation options
- ▶ Customs clearance, packaging and insurance services
- ▶ Scheduled and charter flights
- ▶ Door-to-door and port-to-port air freight services worldwide
- ▶ Dangerous goods transportation

Rail Freight

Through our rail transportation solutions, we provide companies with significant advantages in terms of cost efficiency and transit time. Based on agreements with authorized agents, we ensure the supply of closed, open and special-type wagons across European and Asian railway corridors, acting as a reliable solution partner in rail logistics.

SOME OF OUR SERVICES

- ▶ Strategic partnerships across all railway corridors
- ▶ Pre- and on-carriage support
- ▶ Warehousing and terminal support
- ▶ Equipment diversity based on containers and trailers
- ▶ The advantage of offering long-term fixed pricing

Maritime Transportation

Leveraging its global partnerships in international sea transportation, Logitrans offers advantageous freight conditions for all maritime logistics operations. With transport models based on operational flexibility and strong regional expertise, we develop tailor-made, efficient and sustainable solutions for each customer.

Through our extensive service network — from the Far East to the Middle East, from South Asia to Europe, and from North and South America to Africa — we provide uninterrupted sea freight services worldwide. By offering weekly scheduled sailings, consolidation programs, warehousing and inland transport operations, as well as palletizing services in an integrated structure, we manage all processes from a single center, 24/7.

SOME OF OUR SERVICES

- ▶ Container cross-trade services under NVOCC status (cross-booking)
- ▶ International agency network
- ▶ FCL / LCL container transportation services
- ▶ Port operations and cargo securing services (lashing)
- ▶ Local and international customs services
- ▶ Bonded warehouse services
- ▶ Container storage services
- ▶ Inland container transportation
- ▶ Comprehensive logistics consultancy for combined transport solutions

Cold Chain (Frigo) Transportation

Logitrans Logistics fulfills customer requests with speed and precision. All products requiring temperature control — such as fresh fruits and vegetables, ornamental plants, chilled and frozen food, pharmaceutical and chemical products — are transported using specialized refrigerated vehicles.

Recognizing the critical importance of the cold chain in logistics, we carry out reefer transportation with the highest level of care and operational discipline. By minimizing potential risks during transportation, we deliver temperature-sensitive cargo worldwide using fully equipped vehicles with adjustable refrigeration systems, while offering competitive pricing to ensure customer satisfaction. We support your cold chain transportation needs across Europe and all CIS countries.

SOME OF OUR SERVICES

- ▶ Pre-loading service report
- ▶ Online temperature monitoring via Casus sensors
- ▶ Instant temperature control report at delivery
- ▶ Modern and high-quality equipment fleet

Less Than truck Load(LTL)

The experience and reliability of LOGITRANS, as in all its services, stand out particularly in LTL (Less Than Truckload) transportation. It is a cost-effective solution for customers seeking optimized options in international transportation, especially to the CIS and European countries. Within the scope of our 360° Service Concept, Logitrans manages customs clearance, insurance and warehousing services from a single center, offering a fully integrated solution.

By providing pre- and on-carriage services, transshipment and warehouse handling, Logitrans clearly differentiates itself from its competitors.

We deliver shipments of any volume from our central warehouse in Tuzla (Istanbul) or from any location in Turkey to the destination address specified by our customers, supporting their operational processes with competitive pricing.

Our vehicles, operating regular weekly LTL departures, are ready to meet all your transportation needs.

SOME OF OUR SERVICES

- ▶ LTL transportation on all routes, primarily to the CIS and Europe
- ▶ Warehousing and loading operations
- ▶ Inland transportation and transshipment services
- ▶ Door delivery from warehouse or origin
- ▶ Logitrans 360° service concept with insurance, customs clearance and warehousing services

Express / Speedy Transportation

In trade operations, urgent situations often arise — whether it is a small but critical machine part or fabric samples that must reach an exhibition on time. In such cases, when both time and budget are limited, **LOGITRANS** is always there to help — this time with **Express speed**.

Enjoy fast and secure transportation with Logitrans Express: no time lost in customs and more cost-effective solutions compared to air freight. For detailed information and a quotation based on your global transportation needs, please contact us.

Intermodal / Multimodal Transportation

Together with our experienced teams, we provide services across all regions we operate in, utilizing sustainable and environmentally friendly transport models — primarily based on sea and rail transportation, supported by road and air solutions.

Among the advantages of our intermodal and multimodal solutions are fixed transit times, pre- and on-carriage support, a wide range of equipment, reduced carbon emissions and the opportunity to secure long-term fixed pricing.

AN ENVIRONMENTALLY FRIENDLY AND SUSTAINABLE INTERMODAL APPROACH

With a strong sense of responsibility towards the world, we actively promote intermodal and multimodal transportation, which generates significantly lower carbon emissions compared to road transport, and we increasingly utilize these models to meet our customers' needs.

By using equipment such as **Swap Body** and **45' High Cube**, we create cost advantages and faster deliveries thanks to the ability to transport higher volumes in a single shipment compared to road transportation.

Project Transportation

Within the service portfolio of **LOGITRANS**, project logistics holds a prominent position. With its extensive experience in this field, LOGITRANS continues to be a major player, successfully organizing and executing shipments that require complex fleet planning and logistics operations.

Across many countries worldwide, using all modes of transport, and regardless of whether the cargo is temperature-controlled, standard or oversized, we have provided logistics support for hundreds of projects. By choosing LOGITRANS as your logistics partner for project or tender operations, you can add value to your organization and ensure operational sustainability.

SOME OF OUR SERVICES

- ▶ Multimodal and heavy cargo transportation solutions
- ▶ Warehousing and transshipment solutions
- ▶ Crane rental and cargo securing services
- ▶ Tailor-made insurance solutions for project cargo
- ▶ Management of customs processes
- ▶ Allocation of permits and transit documents for oversized and project cargo

Domestic Logistics

While delivering international logistics solutions, **Logitrans Logistics**, supported by its experience, professional team and transportation capabilities, also provides comprehensive services within the domestic market.

With our warehouse in Tuzla, equipped with racking systems and suitable for free storage, our owned fleet and strong agency network, we offer integrated logistics solutions for domestic transportation.

Holding the status of an **Authorized Economic Operator (YY5 / AEO)**, our professional warehouse, operating under 24/7 security control, adds value to your logistics processes in both domestic and international operations.

Warehouse Services

We provide warehousing services to our customers through our warehouses located on the Asian side of Istanbul and in Kazakhstan, combining the experience of our team with advanced warehouse software and a strong IT infrastructure.

We deliver comprehensive solutions in areas such as secure storage of cargo throughout all handling stages, efficient management of cross-docking operations and planning of domestic distribution processes when required.

LOGITRANS ensures end-to-end integration across all stages of logistics operations through its proprietary **WMS (Warehouse Management System)**, **TMS (Transportation Management System)** and **CRM (Customer Relationship Management)** software developed by its own software team.

This enables us to optimize warehousing, transportation and customer service operations, ensuring flexible, accurate and measurable processes while increasing overall efficiency.

Our fully traceable and secure central warehouses, holding **YYS / AEO** status and operating under 24/7 control, are always at your service for all your logistics needs.

Customs Clearance Services

LOGITRANS is a company capable of delivering customs services on an international scale, supported by a principled management approach, a dynamic and experienced team, continuous technology investments and a strong operational infrastructure.

For customers whose customs procedures we manage, we also offer international logistics, domestic transportation, bonded general warehousing, free storage, foreign trade consulting, insurance and IT advisory services, all at competitive rates.

OUR ADVANTAGES

- ▶ Customs clearance for all FTL and LTL road shipments
- ▶ Consulting on customs legislation, tariffs and regulations
- ▶ Documentation handling for transit cargo
- ▶ Accelerated customs procedures thanks to YYS / AEO status

SOME OF OUR SERVICES

- ▶ Import customs clearance
- ▶ Export customs clearance
- ▶ Technical regulations and compliance services
- ▶ Regulatory consulting
- ▶ Guarantee and collateral solutions
- ▶ Legal advisory
- ▶ Authorized Economic Operator (YYS / AEO) Certification

Insurance Services

Steer your trade with confidence! With the value-added service **Logitrans Trust Insurance**, your cargo is fully protected.

We secure all transportation risks you may encounter during shipment under an **All Risk** policy, and resolve potential damages swiftly and effectively through a centralized system managed by our professional claims consultants.

Trust in logistics operations is your fundamental right. With this awareness, we commit to delivering your goods safely to their destination and provide insurance coverage for any damage caused by the driver or the vehicle.

With **Logitrans Trust Insurance**, we minimize unexpected losses and damages during transportation, enabling you to continue your trade with complete peace of mind.

Insurance Services

Why choose Logitrans Trust Insurance?

Logitrans Trust Insurance is issued under the most comprehensive **ALL RISK coverage** applied in cargo insurance.

Thanks to Logitrans' direct agreements with leading insurance companies, we offer **competitive pricing** without compromising the level of protection.

In the event of a claim, all loss adjustment processes are managed through our **centralized professional support team**, ensuring fast, transparent and client-oriented solutions.

Does CMR insurance cover all risks?

CMR insurance does not cover the actual value of the cargo loss.

Under the CMR Convention, carrier liability is calculated as:

Cargo weight × 8.33 × SDR

For example, a cargo worth **USD 10,000** and weighing **10 kg** would be compensated at only about **USD 116** under CMR.

➔ For full protection, we recommend **Logitrans Trust Insurance (ALL RISK)**, covering the cargo at its full value.
